Modules

v1

Version

BASE URL: <https://web-production-67454.up.railway.app/api>

1. Authentication

POST	/login	Public
User login - Get API Token		
Body: email (req), password (req)		
200: { "token": "...", "user": {...} }		
401: { "message": "Invalid credentials." }		

POST	/register	Public
Register new account		
Body: name, email, password (all required)		
201: { "token": "...", "user": {...} }		

POST	/forgot-password	Public
Send password reset link		
Body: email (required)		
200: { "message": "Reset link sent." }		

POST	/reset-password	Public
Reset password with token		
Body: token, email, password (all required)		
200: { "message": "Password reset successfully." }		

GET	/user	Bearer
Get authenticated user data		
Headers: Authorization: Bearer {token}		
200: { "id": 1, "name": "...", "email": "..." }		

GET	/test-auth	Public
API connectivity test		
200: { "ok": true }		

2. Places

Public Routes

GET	/v1/places/search?q={query}	Public
Search places by title or keyword		
Query: q (required, min 3 chars)		
200: { "success": true, "data": [...], "pagination": {...} }		
GET	/v1/places/trending?limit={n}	Public
Get trending places		
Query: limit (optional, default: 10)		
200: { "success": true, "data": [...] }		
GET	/v1/places/filter?min_price={n}&max_price={n}&sort={sort}	Public
Filter places by price/rating		
200: { "success": true, "data": [...], "pagination": {...} }		
GET	/v1/places?page={n}&per_page={n}	Public
List all places (paginated)		
200: { "success": true, "data": [...], "pagination": {...} }		
GET	/v1/places/{place}	Public
Get single place details		
URL: place (integer)		
200: { "success": true, "data": {...} }		
404: { "message": "Record not found" }		

Admin Routes (Protected)

POST	/v1/places	Admin
Create new place		
Body: title, description, ticket_price (all required)		
201: { "success": true, "data": {...} }		
PUT	/v1/places/{place}	Admin
Update existing place		
Body: title, description, ticket_price, image (optional)		
200: { "success": true, "data": {...} }		
DELETE	/v1/places/{place}	Admin
Delete place		
200: { "success": true, "message": "Place deleted." }		

3. Tours

Public Routes

GET

/v1/tours?guide_id={id}&min_price={n}&max_price={n}&plan_id={id}&sort={s}&per_page={n}

Public

List active tours

200: { "success": true, "data": [...], "pagination": {...} }

GET

/v1/tours/search?q={query}&per_page={n}

Public

Search tours

Query: q (required, min 3 chars)

400: { "success": false, "message": "Query too short." }

GET

/v1/tours/filter?min_price={n}&max_price={n}&guide_id={id}&start_date={d}&plan_id={id}

Public

Filter tours

200: { "success": true, "data": [...], "pagination": {...} }

GET

/v1/tours/popular?limit={n}

Public

Most booked tours

200: { "success": true, "data": [...] }

GET

/v1/tours/{tour}

Public

Get tour details

200: { "success": true, "data": {...} }

GET

/v1/tours/guide/{guide_id}

Public

Get guide's tours

200: { "success": true, "data": [...], "pagination": {...} }

Protected Routes

POST

/v1/tours

Guide

Create new tour

Body: title (req), price (req), description, start_date, plan_id, places[]

201: { "success": true, "message": "...", "data": {...} }

PUT

/v1/tours/{tour}

Owner

Update tour

200: { "success": true, "message": "...", "data": {...} }

403: { "success": false, "message": "Unauthorized." }

DELETE

/v1/tours/{tour}

Owner/Admin

Delete tour

200: { "success": true, "message": "Tour deleted." }

GET

/v1/my-tours

Guide

Get my tours (guide)

200: { "success": true, "data": [...], "pagination": {...} }

4. Comments

Public Routes

GET /v1/comments/{type}/{id}

Public

Get comments for resource

type: tours|places|plans, id: integer

200: { "success": true, "data": [...] }

GET /v1/{type}/{id}/comments

Public

Get comments (alt URL)

200: { "success": true, "data": [...] }

GET /v1/{type}/{id}/comments/count

Public

Get comment count

200: { "success": true, "count": 42 }

GET /v1/comments/{comment}

Public

Get single comment

200: { "success": true, "data": {...} }

GET /v1/user/{userId}/comments

Public

Get user's comments

200: { "success": true, "data": [...] }

Protected Routes

POST /v1/comments

Bearer

Add comment

Body: content (req), commentable_type (req), commentable_id (req)

201: { "success": true, "data": {...} }

POST /v1/{type}/{id}/comments

Bearer

Add comment (alt URL)

Body: content (required)

201: { "success": true, "data": {...} }

PUT /v1/comments/{id}

Owner

Update comment

200: { "success": true, "data": {...} }

DELETE /v1/comments/{comment}

Owner/Admin

Delete comment

200: { "success": true, "message": "Comment deleted." }

5. Likes

Public Routes

GET

/v1/{type}/{id}/likes

Public

Get likes for resource

```
200: { "success": true, "data": [...] }
```

GET

/v1/{type}/{id}/likes/count

Public

Get like count

```
200: { "success": true, "count": 14, "liked_by_me": false }
```

Protected Routes

GET

/v1/user/likes

Bearer

Get my likes

```
200: { "success": true, "data": [...] }
```

POST

/v1/likes

Bearer

Add like

Body: likeable_type (req), likeable_id (req)

```
201: { "success": true, "data": {...} }
```

```
409: { "success": false, "message": "Already liked." }
```

POST

/v1/likes/toggle

Bearer

Toggle like (add/remove)

```
200: { "success": true, "liked": true, "count": 15 }
```

DELETE

/v1/likes/{like}

Owner

Remove like by ID

```
200: { "success": true, "message": "Like removed." }
```

DELETE

/v1/{type}/{id}/likes

Bearer

Remove like from resource

```
200: { "success": true, "message": "Like removed." }
```

6. Analysis

POST

/v1/analysis/user_activity

Bearer

Get my activity analysis

200: { "success": true, "data": {...} }

GET

/v1/analysis/users-all

Admin

Get all users analysis (admin)

200: { "success": true, "data": {...} }

7. Payments

User Routes

GET /v1/payments/my-payments?status={s}&per_page={n}

Bearer

Get my payments

```
200: { "success": true, "data": [...], "pagination": {...} }
```

POST /v1/payments

Bearer

Create payment

Body: amount (req), payable_type (req), payable_id (req), payment_method, transaction_id, receipt_image, notes

```
201: { "success": true, "message": "...", "data": {...} }
```

GET /v1/payments/{id}

Bearer

Get payment details

```
200: { "success": true, "data": {...} }
```

Admin Routes

GET /v1/payments?status={s}&payable_type={t}&user_id={id}&from_date={d}&to_date={d}

Admin

List all payments

```
200: { "success": true, "data": [...], "pagination": {...} }
```

PUT/PATCH /v1/payments/{payment}

Admin

Update payment

Body: status (approved|failed|pending), amount

```
200: { "success": true, "data": {...} }
```

DELETE /v1/payments/{id}

Admin

Delete payment

```
200: { "success": true, "message": "Payment deleted." }
```

GET /v1/payments/statistics

Admin

Payment statistics

```
200: { "success": true, "data": { "total": 0, ... } }
```

POST /v1/payments/{id}/approve

Admin

Approve payment

```
200: { "success": true, "message": "...", "booking_updated": true }
```

POST /v1/payments/{id}/reject

Admin

Reject payment

```
200: { "success": true, "message": "Payment rejected." }
```

POST /v1/payments/bulk-approve

Admin

Bulk approve payments

Body: payment_ids (array, required)

```
200: { "success": true, "approved_count": 3 }
```

GET /v1/users/{userId}/payments

Admin

Get user's payments

```
200: { "success": true, "data": [...] }
```

8. Tour Bookings

GET	/v1/tour-bookings/my-bookings?status={s}&per_page={n}	Tourist
Get my bookings		
200: { "success": true, "data": [...], "pagination": {...} }		
GET	/v1/tour-bookings/statistics	Bearer
Booking statistics		
200: { "success": true, "data": { "total": 0, ... } }		
POST	/v1/tour-bookings	Tourist
Create booking		
Body: tour_id (req), participants_count (req, min: 1)		
201: { "success": true, "data": {...}, "next_step": {...} }		
GET	/v1/tour-bookings?status={s}&tour_id={id}&per_page={n}	Bearer
List bookings (by role)		
200: { "success": true, "data": [...], "pagination": {...} }		
GET	/v1/tour-bookings/{id}	Bearer
Get booking details		
200: { "success": true, "data": {...} }		
PUT/PATCH	/v1/tour-bookings/{booking}	Bearer
Update booking		
Tourist: participants_count Guide/Admin: status		
200: { "success": true, "data": {...} }		
DELETE	/v1/tour-bookings/{id}	Tourist
Cancel booking		
200: { "success": true, "message": "Booking cancelled." }		
GET	/v1/tours/{tourId}/bookings	Guide/Admin
Get tour bookings		
200: { "success": true, "data": [...], "pagination": {...} }		
POST	/v1/tour-bookings/{id}/approve	Guide/Admin
Approve booking		
200: { "success": true, "message": "Booking approved." }		
POST	/v1/tour-bookings/{id}/reject	Guide/Admin
Reject booking		
200: { "success": true, "message": "Booking rejected." }		

9. Conversations

POST

/v1/conversations

Bearer

Start new conversation

Body: context (image_generation|travel_plan|info_request|general|place_inquiry|tour_inquiry)

201: { "success": true, "data": { "id": 1, "context": "..." } }

GET

/v1/conversations?context={c}&with_images={bool}&per_page={n}

Bearer

List conversations

200: { "success": true, "data": [...], "pagination": {...} }

GET

/v1/conversations/statistics

Bearer

Conversation statistics

200: { "success": true, "data": { "total": 0, "by_context": {...} } }

GET

/v1/conversations/{id}

Owner

Get conversation

200: { "success": true, "data": { "messages": [...], ... } }

DELETE

/v1/conversations/{id}

Owner

Delete conversation

200: { "success": true, "message": "Conversation deleted." }

POST

/v1/conversations/{id}/messages

Bearer

Send message

Body: sender (req: user|bot), message (req), image_url, place_id

201: { "success": true, "data": { "message": {...}, "generated_image": {...} } }

GET

/v1/conversations/{id}/messages

Owner

Get conversation messages

200: { "success": true, "data": [...] } }

GET

/v1/conversations/{id}/images

Owner

Get conversation images

200: { "success": true, "data": [...] } }

10. Plans

GET

/plans/my

Bearer

Get my plans

200: { "data": [...], "links": {...}, "meta": {...} }

GET

/plans?search={s}&user_id={id}&with_places={bool}&budget={n}

Bearer

List all plans

200: { "data": [...], "links": {...}, "meta": {...} }

POST

/plans

Bearer

Create plan

Body: title (req, max: 255), plan_items[].place_id (req), plan_items[].day_index (1-365)

201: { "data": { "id": 1, "title": "...", "total_price": 150.00, ... } }

GET

/plans/{plan}

Bearer

Get plan details

200: { "data": {...} }

PUT/PATCH

/plans/{plan}

Owner

Update plan

200: { "data": {...} }

DELETE

/plans/{plan}

Owner

Delete plan

204: (empty body)
